PROFILE SUMMARY

Fresh graduate in Informatics Engineering from Gunadarma University (GPA: 3.63/4.00) with hands-on experience building production-ready backend systems using PHP, Java, and MySQL. Proven ability to design scalable REST APIs, relational databases, and secure authentication systems across academic and personal projects. Detail-oriented, fast learner, and highly motivated to contribute as a Junior Backend Developer in a collaborative engineering team.

EDUCATION

Gunadarma University – Depok, West Java

Bachelor of Informatics Engineering | GPA: 3.63 / 4.00

Relevant Courses: Data Structures, Object-Oriented Programming, Web Programming, Software Engineering, Database Systems, Operating Systems.

SKILLS

Hard Skills

- Programming Languages:** PHP (Advanced), Java (Intermediate), Python (Intermediate), JavaScript (Basic), HTML5, CSS3
- Frameworks & Libraries:** Laravel (Intermediate), CodeIgniter (Intermediate), Bootstrap 5, Spring Boot (Basic), Vue.js (Basic)
- Database:** MySQL (Intermediate), PostgreSQL (Basic), SQL Query & Optimization, Database Design & Normalization
- Tools:** Git, GitHub, Postman, VS Code, XAMPP, Linux (Basic), Unit Testing, Microsoft Excel (Basic)

Soft Skills

- Strong analytical and problem-solving mindset
- Detail-oriented with clean code practices.
- Fast learner and adaptable to new technologies.
- Collaborative and feedback-oriented team player

PROJECT EXPERIENCE

Personal Project | TokoKu E-Commerce Platform Backend Developer

Jan 2026 – Feb 2026

Backend Developer | github.com/B3rlinSugi/tokoku-ecommerce

- Built a 10-table relational e-commerce backend supporting multiple payment methods (bank transfer and e-wallet) with 0 transaction failures during end-to-end testing.
- Engineered a voucher discount engine and secure RBAC authentication system with tokenized password reset, achieving 0 unauthorized access incidents during testing.
- Built a secure authentication system with role-based access control for admin and customer roles, including password reset via tokenized email flow with 1-hour expiry, achieving 0 unauthorized access incidents during testing.
- Developed real-time stock management module and admin dashboard with sales analytics, revenue charts, and payment breakdowns using Chart.js.

Academic Project | Cash Flow Class Management System Backend Developer

Jun 2023 – Jul 2023

Backend Developer | github.com/B3rlinSugi/cash-flow

- Upgraded legacy MD5 authentication to bcrypt and redesigned database schema with InnoDB, Foreign Key constraints, and proper indexing.
- Built a real-time 6-month cash flow analytics dashboard using Chart.js and a deferred payment tracking module with automatic status management.
- Added PDF report export filtered by month and transaction type, enabling auditable financial records for organizational use.

Academic Project | Sistem Data Akademik (CRUD Application)

Mar 2024 – Jul 2024

Backend Developer | github.com/B3rlinSugi/crud-akademik

- Upgraded legacy MD5 authentication to bcrypt and redesigned database schema with InnoDB, Foreign Key constraints, and proper indexing.
- Built a real-time 6-month cash flow analytics dashboard using Chart.js and a deferred payment tracking module with automatic status management.
- Added PDF report export filtered by month and transaction type, enabling auditable financial records for organizational use.

ORGANIZATIONAL EXPERIENCE

Student Executive Board, Faculty of Industrial Technology – Gunadarma University

Head of Social & Political Affairs Division

- Led two departments managing 15+ active student members, ensuring 100% program completion rate within the semester timeline.
- Established structured communication channels and clear workflows, reducing miscommunication incidents across departments.
- Facilitated cross-department collaboration for campus social programs, aligning division goals with faculty-wide strategic objectives.

TRAINING & CERTIFICATIONS

Gunadarma University – Depok, West Java

- Fundamental Server Operating System – 2022
- Fundamental Database Management System – 2022
- Oracle Database for Beginners – 2023
- Linux System Administration – 2023
- Basic Web Application Design – 2024
- Basic Web Application Development – 2025
